ACTODERMANOL®

Hand and Skin Antiseptic with Ethanol 70 % (V/V)

Areas of Application:

Suitable for frequent use within the day during patient care, before contact with neutropenic and immunosuppressive patients, before and after contact with patients in the isolation room, for skin antiseptics before injection, before and after invasive procedures, before and after wearing gloves, especially in units where the workload and the number of patients are intense. Suitable for use in public health field.

Method of Use:

Hygienic hand antiseptics:

Remove all jewelry before use. Make sure that the nails are not long. Take 3-5 mL of **Actodermanol®**. Apply for 30 seconds according to **EN 1500** standard.

Surgical hand antiseptics:

Remove all jewelry before use. Make sure that the nails are not long. Take the sufficient amount of

product in a way to keep skin wet during application. According to **EN 12791** standard, disinfect your hands, including wrists and elbows, with **Actodermanol®** by wet rubbing both hands for a total of 3 minutes. If necessary, take disinfectant again during the procedure.

Spray on skin before injections. Wipe after waiting for 30 secs.

Chemical Composition:

100 g contains:

65.9 g of Ethanol (70 % V/V), emollient (Lanolin), auxiliary substances.

Instructions For Use (EN 1500):

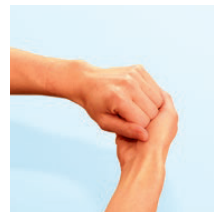

1st step:
Rub hands palm to palm.

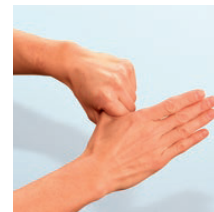

2nd step:
Rub right palm over the back of left hand with interlaced fingers and vice versa.

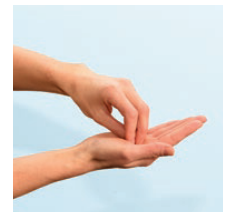

3rd step:
Rub again palm to palm with interlaced fingers.

4th step:
Rub the back of fingers to opposing palms with fingers interlocked, repeating this action for each hand.

5th step:
Rub rotationally right thumb clasped in left palm and vice versa.

6th step:
Rub rotationally backwards and forwards with clasped fingers of left hand in right palm and vice versa.
